

K-LOVE is an important part of the community I live in in that it provides a clean and safe radio environment for my family and I. I don't have to worry about my children (2) being exposed to the type of depravity that has become increasingly available on the radio. Should this programming be displaced in the community it is my sincere belief that the community will lose a very important resource in the development of family and community. It provides a balanced and wholesome alternative to the continuing "shock" radio that is pervasive on the radio today.
